Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) Part and Entity Unique Identifiers: Simplify your work by using a unique identifier for each object, and a unique identifier for each part. When you use part ID numbers, the drawing order is reversed, and it is harder to keep your drawings consistent. With Entity Unique Identifiers, you can quickly identify and distinguish between entities in a drawing, which is the proper way to draw. It's the only choice for AutoCAD! (video: 1:50 min.)
